Lucas Lagoa

UX/UI Designer | Product Designer
Campinas, São Paulo - Brazil
+55 19 99535-9443 | Linkedin | llplagoa@gmail.com

Professional Summary

Product Designer and UX/UI Designer with end-to-end experience designing and evolving scalable digital products across EdTech, SaaS, B2B platforms, AI/ML, and digital technology environments. Expertise across Product Discovery, UX Research, Information Architecture, User Flows, Interaction Design, UI Design, Prototyping, Usability Testing, Design Systems, and Accessibility (WCAG). Proven ability to redesign complex user journeys and translate research, behavioral data, analytics, and business requirements into intuitive, measurable product experiences. Delivered measurable impact, including increasing onboarding completion from approximately 60% to 88% and supporting 7,062 completed candidate journeys in a major admission cycle. Strong command of Figma, responsive web/mobile design, data-driven design, product analytics, Agile collaboration, design documentation, and developer handoff. Front-end knowledge in HTML, CSS, JavaScript, React, APIs, and Git/GitHub, enabling effective collaboration with Product and Engineering teams and technically feasible design decisions.

Core Competencies & Technical Skills

Product & UX Design: Product Design | UX/UI Design | Product Discovery | UX Strategy | User-Centered Design | UX Research | User Interviews | Usability Testing | Journey Mapping | User Flows | Information Architecture | Personas | UX Writing | Requirements Definition
UI, Interaction & Design Systems: UI Design | Interaction Design | Wireframing | High-Fidelity Prototyping | Responsive & Mobile-First Design | Design Systems | Component Libraries | Design Tokens | Auto Layout | Accessibility (WCAG) | Visual Hierarchy
Product Analytics & Optimization: Data-Driven Design | Product Metrics | User Behavior | Engagement Analysis | Google Analytics | Hotjar | Benchmarking | Nielsen Heuristics | Conversion Optimization | Continuous Product Improvement
Methods & Collaboration: Design Thinking | Double Diamond | Lean UX | Agile | Scrum | Kanban | Workshop Facilitation | Stakeholder Management | Cross-Functional Collaboration | Design Documentation | Developer Handoff
Design & Research Tools: Figma | FigJam | Framer | Miro | Maze | UserTesting | UserZoom | Typeform | Notion | Jira | Confluence | Trello
Front-End & Technical: HTML5 | CSS3 | JavaScript | React | Vue.js | Tailwind CSS | APIs | Git | GitHub
Additional Tools: Sketch | Adobe Photoshop | Adobe Illustrator | Adobe After Effects | Qualtrics | Supernova | Android Studio | Xcode

Professional Experiences

UX/UI & Product Designer **| NUBO – Remote** **Dec 2024 – Present**

- Evaluate digital ads, search results, and landing pages for relevance, quality, accuracy, user intent, and contextual fit, applying detailed project guidelines to generate consistent human feedback for advertising platforms.
- Analyze relationships among search queries, advertisements, and destination pages using Search Quality, Ad Relevance, Intent Analysis, and contextual relevance criteria to determine alignment with user needs and expected outcomes.
- Review advertising content and landing pages for misleading, irrelevant, unsafe, or low-quality information, supporting Content Quality, User Experience, Platform Integrity, Brand Safety, and policy-compliant digital experiences.
- Apply policy frameworks, rating rubrics, and evaluation guidelines to classify digital content objectively across relevance, cultural appropriateness, safety, quality, and compliance while maintaining consistent judgment at scale.
- Perform Quality Assurance and Quality Control on ratings, validating accuracy, consistency, completeness, and adherence to standards while meeting productivity expectations and calibration requirements for international projects.
- Identify and classify potentially harmful, fraudulent, deceptive, or inappropriate content using Content Moderation, Scam Detection, Brand Safety, and Safety & Compliance principles to help protect users and platform integrity.
- Provide human-in-the-loop evaluation signals for AI and Machine Learning systems by rating ads, search results, and digital content, supporting algorithm improvement, search optimization, personalization, and model performance.
- Assess usability, content hierarchy, interaction patterns, navigation, and overall UX across digital experiences, producing structured qualitative feedback and actionable insights that support product and interface improvement.

ADS Quality Rater **| TELUS International – Remote** **Aug 2025 – Present**

- Evaluate digital ads, search results, and landing pages for relevance, accuracy, quality, user intent, and contextual fit, applying detailed rating guidelines to generate reliable human feedback for advertising and AI-driven platforms.
- Analyze search queries, advertisements, and destination pages using Search Quality, Ad Relevance, Intent Analysis, and contextual relevance criteria, identifying alignment gaps between user needs, content, and expected digital experiences.
- Review advertising content and landing pages for misleading, unsafe, irrelevant, or low-quality information, applying Content Moderation, Brand Safety, Scam Detection, Platform Integrity, and Safety & Compliance principles.
- Perform Quality Assurance and Quality Control across evaluations, validating rating accuracy, consistency, completeness, and adherence to project standards while meeting productivity, quality thresholds, and calibration requirements.
- Generate human-in-the-loop evaluation signals for AI and Machine Learning systems by rating search results, ads, and digital content, supporting algorithm improvement, search optimization, personalization, and AI model performance.
- Assess usability, navigation, content hierarchy, interaction patterns, and overall UX across digital experiences, producing structured qualitative feedback and actionable insights to support Product Design and continuous product improvement.

AI Data Annotator **| TransPerfect – Vancouver, BC, Canada** **Jun 2024 – Sep 2024**

- Analyzed and annotated English-language data to identify errors, inconsistencies, and quality issues, contributing reliable training datasets for Artificial Intelligence, Machine Learning, NLP, and speech recognition systems.

- Classified, categorized, and labeled high-volume datasets according to project-specific guidelines, maintaining accuracy, consistency, and data quality across Machine Learning training, AI evaluation, and Human-in-the-Loop workflows.
- Created, reviewed, and refined natural-language prompts simulating realistic user interactions and varied complexity levels, supporting Prompt Engineering, Generative AI, AI assistant, and Large Language Model testing and evaluation.
- Performed Quality Assurance and Quality Control across annotations, transcripts, prompts, and AI outputs, validating accuracy, completeness, linguistic quality, consistency, and adherence to detailed project requirements and standards.
- Identified, documented, and reported annotation and data issues using root-cause analysis, issue tracking, and structured problem-solving, helping improve dataset reliability, annotation processes, and overall AI training data quality.
- Evaluated AI outputs and digital experiences for usability, relevance, navigation, interaction patterns, content quality, and user intent, delivering structured feedback and qualitative insights to support UX and digital product improvement.

Education

Postgraduate Program in Full-Stack Development
Descomplica — Brazil
Expected Nov 2026 | In Progress

College Diploma in UI/UX Design
Tamwood Careers College — Vancouver, BC, Canada
Nov 2024

Language Skills

- Portuguese: Native
- English: Fluent
- French: Intermediate

Certifications & Courses

- Foundations of Project Management – Google — Nov 2025 | Credencial: TWA9GLYOBF9A
- Front-End Development Bootcamp — DIO, 2025
- SQL for Data Analysis: Beginner to Advanced — Udemy, 2025
- PRO FIGMA | UI Design from Beginner to Specialist, 2025
- Google Project Management, 2025
- Building Design Systems in Figma from Scratch — UI/UX Mastery, 2024

Selected Projects

Book & Bite
- UX/UI concept for a digital product connecting users with restaurants based on dietary needs and preferences, designed to make restaurant discovery and table reservations faster and more personalized.
  Portfolio: https://www.behance.net/gallery/212452395/Book-Bite-English

Buddy Up
- Productivity application designed around shared accountability, connecting users to improve task and goal completion through social motivation, ongoing support, and collaborative engagement.
  Portfolio: https://www.behance.net/gallery/195293701/BuddyUp-an-Accountability-App

Instagram 1.5
- UX/UI redesign concept exploring usability improvements for Instagram, including Grid View and Infinite Carousel functionality, with a focus on improving navigation and the overall user experience.
  Portfolio: https://www.behance.net/gallery/195293549/Instagram-15
